

NovaCart — Account & Privacy Support Policy

Account Assistance

- Customers can request help with account access, profile information, and account-related issues.
- Account-specific changes may require identity verification.

Security

- NovaCart support will never ask customers to disclose passwords, OTPs, card PINs, CVV values, or other authentication secrets.
- Sensitive credentials must not be stored in support tickets or conversation notes.

Privacy

- Customer information should only be accessed when necessary to resolve a support request.
- Support systems should limit customer-data access according to role and authorization.

Escalation

- Suspected account compromise, unauthorized transactions, or sensitive security incidents should be escalated for human investigation.
