

NovaCart — Cancellation Policy

Before Shipment

- Customers may request cancellation while an order is in an eligible pre-shipment state.
- Cancellation depends on the current order status and may fail if processing has already progressed.

After Shipment

- Orders that have already been shipped generally cannot be cancelled through the normal cancellation process.
- Customers may need to follow the applicable return or refund process after delivery.

Confirmation

- A cancellation request is not considered successful until the system confirms the order as cancelled.
- Support should verify the order status before confirming cancellation.
