

NovaCart — Refund Policy

Eligibility

- Eligible products may be returned or refunded within 7 calendar days of delivery, subject to product-specific conditions.
- Products must generally be unused and returned with applicable accessories and original packaging where required.
- Some products may be marked non-returnable or non-refundable.

Refund Processing

- After an eligible return is approved and verified, NovaCart initiates the refund.
- Refund processing normally takes 5–7 business days after refund initiation.
- The final credit time can depend on the payment provider or bank.

Payment Deducted but Order Failed

- If payment was deducted but the order failed, support must first verify payment and order status.
- If payment is confirmed but no successful order exists, the issue may require payment reconciliation and a support ticket.
- Support must not claim that a refund was initiated unless the system confirms it.

Exceptions

- Non-refundable products are not eligible for a standard refund unless an applicable exception is confirmed.
- Damaged or incorrect items should be reported as soon as possible with the requested evidence.
