

NovaCart — Shipping & Delivery Policy

Shipping

- NovaCart processes orders after payment and order confirmation.
- Shipping timelines vary by destination, product availability, and logistics conditions.

Delivery Status

- Customers can request current delivery status using their order ID.
- Typical statuses include Processing, Shipped, Out for Delivery, and Delivered.
- An estimated delivery date is not a guarantee and may change.

Delayed Delivery

- If an order is delayed beyond the expected delivery window, support should verify the latest delivery information.
- Repeated or significant delivery issues may be converted into a support ticket.

Address

- Customers should verify their shipping address before placing an order.
- Address changes after shipment may not be possible through the standard support flow.
